

Two Companies, One Solution

*Highly Engineered,
Quality Expansion Joints for
India's Petrochemical & Oil Refineries*

Global Leaders in Expansion Joint Design & Manufacturing

The Best of Both Worlds

Two prominent global companies, two respected manufactures, both leading innovators of expansion joint design, engineering, fabrication and installation. Both delivering our talents and strengths to India's flourishing energy market. This union is going to provide the Indian market with quality, highly engineered expansion joints at competitive prices.

We are pleased to announce the union of

Flexican Bellows & Hoses (India)
and Expansion Joint Systems (USA)

Your optimal choice for complex design, engineering and local manufacturing

LOCALIZED SALES, SERVICE AND MANUFACTURING

EJS, North America's leading expansion joint designer and manufacturer, and Flexican Bellows & Hoses, premier expansion joint manufacturer in India are proud to bring our high quality, innovative expansion joint design, engineering and fabrication to the Indian petrochemical and oil refining industry.

Although there are over 13,000 kilometers between us, our quality and commitment to our customer's satisfaction will be maintained. EJS (USA) provides design, engineering, project management and quality assurance for all projects. The complex and distinctive bellows are always supplied for final fabrication by EJS (USA) as well as other complex structures as required. Each product carries the EJS brand and guarantee for the final product including warranty, which is maintained by EJS (USA).

Our alliance has been formed based on our companies' mutual standards and capabilities to provide quality expansion joints to our customers that are representative of the EJS and Flexican Bellows name. Ensuring that our products perform with high efficiency, reliability and above all, safety.

Flexican Bellows & Hoses Private Ltd.

began as a pioneer in the metal hose and bellows industry as part of Zaverchand Gaekwad Ltd. (ZG) in 1971. Today, with a modern factory and innovative bellows manufacturing technology, Flexican is a leading manufacturer of expansion joints, metal bellows and hoses in the Indian marketplace. Many

expansion joints require specialised designing and high precision manufacturing capabilities. As an ISO 9001 certified company, Flexican has established an excellent reputation for manufacturing quality products to their customers in steel plants, refineries, petrochemicals, cement, power plants, fertilizers and other diverse industries. The company’s workshop has been approved by the leading project consultants:

LRIS, EIL, NPC, Bureau Verities, PDIL, TOYO, BHEL, KPG, UDHE, JH&G, DNV, etc.

With customers such as Bharat Petroleum Corp Ltd., Indian Oil Co. Ltd., Reliance Petro Chemicals Ltd., and Gujarat Refinery, to name a few, Flexican Bellows & Hoses is a proven leader in expansion joint technology and manufacturing.

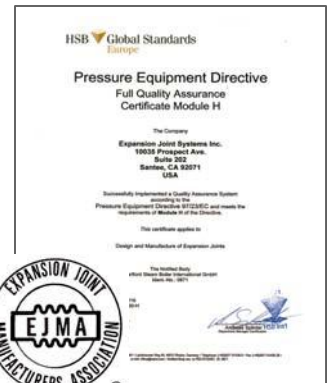

QUALITY • EXPERIENCE • INNOVATION • RELIABILITY

Flexican’s innovative strength transcend in the recent union with one of the world’s leading designer and manufacturer of expansion joint solutions and services, **Expansion Joint Systems, Inc. (EJS)**. Since 1984, EJS has been a pioneer in advanced expansion joint design, engineering and manufacturing technology. The company provides both custom and standard designs, but their area of expertise has always been on highly-engineered, complex expansion joints for applications exposed to extreme conditions such as those used in fluid catalytic cracking (FCCU) and continuous catalytic regenerator (CCR) processes. Our design and engineering team offers full calculation and design packages that include complete detailed drawings, 3D models, bellows design analysis, and finite element analysis if required. As an active member of the Expansion Joint

Manufacturers’ Association (EJMA) and a certified ASME and PED manufacturer, you can be assured that our design and manufacturing processes are the most progressive practices used in the industry today to ensure safety, quality and enduring performance of your expansion joints.
